

# Pack battery foreign trade

## Overview

---

How much battery material does China Import & Export?

China imported almost 12 million short tons of raw and processed battery minerals, accounting for 44% of interregional trade, and exported almost 11 million short tons of battery materials, packs, and components, or 58% of interregional trade in 2023, according to regional UN Comtrade data.

Are China and India reassessing sourcing strategies for lithium batteries?

China's new export restrictions on lithium battery materials and technologies have prompted global manufacturers to reassess sourcing strategies, while Indian firms frame the move as both a disruption and an opening for diversification. From pv magazine India.

Will China tighten export controls on lithium battery materials & production equipment?

Following China's recent decision to tighten export controls on lithium battery materials and production equipment, industry leaders in India view the development as both a challenge and a catalyst.

Which country exports the most battery cells in the world?

China accounted for 74% of the world's battery pack and component exports in 2023. That same year, China controlled nearly 85% of the world's battery cell production capacity by monetary value. Data source: United Nations Statistics Division, UN Comtrade Note: Excludes trade within regions.
