

# **Palestine solar power generation system manufacturer**

## Overview

---

What is the electrical energy system in Palestine?

The electrical energy system in Palestine state is different from any other country, because Palestine imports its energy from three different sources; from Israel (85 %), Jordan (2 %) and Egypt (3 %). In addition to 140 MW capacity diesel-fired combined cycle power station.

What is Palestine's energy strategy?

Palestine's approach is to priorities high-emitting sectors such as, power generation (62 %), transport (15 %), and waste (23 %). The National Adaptation Plan is as: increase the share of renewable energy in electrical energy mix by 20–33 % by 2040, primarily from solar PV. Improve energy efficiency by 20 % across all sectors by 2030.

Can wind energy be used to generate electricity in Palestine?

When Hasan first looked into the possibility of using wind energy to generate electricity in Palestine in 1991, he came to the conclusion that areas with an elevation of 850 meters or more, including Ramallah and Jerusalem, have excellent energy potential . In some areas of the WB, wind energy may be produced at 0.07 \$/kWh .

Is Palestine a good place for solar energy?

With 3,400 hours of sunlight per year and an average daily global solar radiation ranging from 6.15 to 8.27 kWh/m<sup>2</sup>, Palestine has a great potential for solar energy , . The capacity of rooftop solar systems to produce power in the WB and GS is 534 and 163 MW, respectively .
