

**GETON CONTAINERS**

# **Photovoltaic Container Hybrid Used on Chad Farms**

## Overview

---

Are hybrid energy systems a viable alternative to fossil fuels in Chad?

The electricity is produced in Chad solely from thermal plants that use fossil fuels, which are not environmentally friendly. In addition, the electrification rate of Chad is less than 11%. This work aims to propose some reliable electrification options for Chad, through hybrid energy systems.

Does Chad have a hybrid energy system?

In this study, the hybrid energy systems are proposed for all the regions that are not yet electrified in Chad. The National Electricity Company (NEC) of Chad produces and distributes the electricity only in 7 of the 23 regions of Chad; meaning that 16 are un-electrified.

How a hybrid energy system can improve electricity access rate in Chad?

The renewable energy implementation with hybrid system design can significantly reduce greenhouse gas emissions and increase electricity access rate in Chad. The National Electricity Company generates electricity using only the diesel generators.

Can solar/wind/diesel/batteries provide electricity in 25 sites of Chad?

assessed the Grid/PV/Wind hybrid energy system viability to provide electricity in 25 sites of Chad . designed a solar/wind/diesel/batteries for three climatic zones of Chad . investigated the feasibility of solar/wind/diesel/batteries for the supply of energy needs of Amjarass (a town in Chad).

## Photovoltaic Container Hybrid Used on Chad Farms

### [Chad opens tender for solar-diesel hybrid](#)

...

The authorities in Chad have launched a tender for solar-diesel hybrid projects with battery storage, featuring a combined 4 MW of solar capacity and 2 MWh of daily storage.
