You might be surprised at the variety of portable power stations with AC outlets available today, ranging from compact models to those capable of powering heavy-duty appliances.

How many watts can a portable power station put out?

If you need some extra power for a short time, or have an appliance that draws some extra power when it starts up, it can put out a maximum of 3,600 watts. In general, it's best to check the wattage of each device you want to connect to your portable power station and select a power station that can handle them all.
