

Price of customized solar panels for the whole house

Overview

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a solar panel installation cost?

Installation charges typically range from 20% to 30% of the total system price. Professional installers follow local restrictions and optimize panel placement for best efficiency. The small size of the excellent solar panel system makes installation easier, lowering labor time and associated expenses.

How much does a 5kw Solar System cost?

Below is a breakdown of pricing for different home sizes to help you plan your investment. A 5KW solar panel system is typically sufficient for modest households with minimal energy requirements. The average cost for such a system is between \$12,000 and \$16,000.
