

# **Procurement of 200kWh Solar Containers from Türkiye**

## Overview

---

How many people use solar energy in Turkey?

As a consequence of these flourishing developments, the Turkish solar energy sector currently employs over 50,000 people. The share of variable renewable energy sources, such as solar and wind, in total electricity generation is expected to increase. This is considering Türkiye's current flexibility opportunities, and renewable energy potential.

How many solar power plants are there in Türkiye?

Solar power installed capacity increased by 1,610 MW, compared to the end of 2021. There are 11,427 power generation plants in Türkiye and the number of unlicensed and licensed small power producers (SPPs) reached 9,353 (TEİAŞ, 2022). With solar PV installations exceeding 9 GW in less than 10 years, the PV panel production market has also expanded.

Does Türkiye have a wind & solar auction?

Türkiye's wind and solar auctions has tendered 7.8 GW of solar and wind capacity, but less than a quarter is currently operational. Recent policy changes aim to boost investor confidence, yet faster permitting processes and better financing are needed to meet 2035 targets.

How much does Türkiye solar cost in 2025?

In January 2025, the average free market price was \$71 per MWh, approximately twice the auction price, serving as an incentive for investors to accelerate the implementation of their projects. Additionally, tapping into Türkiye's floating solar potential estimated at 53 GW, offers a substantial opportunity for growth within the YEKA model.
