

San Jose exports solar panels to Bai

Overview

Where do solar PV exports come from?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports.

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment – a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.

Which countries export solar panels to the United States?

CHANGING TRADE ROUTES Solar panel exports from Vietnam, Malaysia, Thailand and Cambodia to the U.S. fell by 33% on an annual basis in the nine months since the first round of tariffs in June. In the same period, exports from regional neighbours Indonesia and Laos grew around eight-fold, the trade data showed.

Why are Chinese solar manufacturers rethinking export strategies?

Solar cells accounted for roughly 28% of all U.S. solar imports since the first round of tariffs, compared with 6.5% in 2023, the data showed. Chinese manufacturers are already revising export strategies due to concerns about tariffs on Indonesia and Laos, said Fei Chen, solar research analyst at consultancy Rystad Energy.
