Serbia Electric Flow Battery Manufacturer

Overview

Could Serbia be a technological leader in LFP battery production?

The Republic of Serbia could be a technological leader in LFP battery production in the whole world outside of China, because it has a chance to become the first in Europe to mass-produce this type of battery. The signed Memorandum with the European Union envisages a serious focus on the ecosystem of electric vehicles and battery production.

What is the first LFP battery cell facility in Europe?

Subotica, Serbia, 24. April 2023 – Today, ElevenEs, the pioneer in LFP (Lithium Iron Phosphate) cathode battery technology, announces the opening of the first industrial facility dedicated to LFP battery cell production in Europe. ElevenEs, backed by EIT InnoEnerg.

Where are LFP battery cells made?

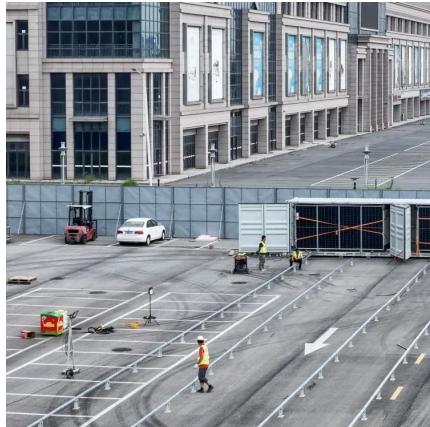

Subotica, Serbia, 24. April 2023 – Today, ElevenEs, the pioneer in LFP (Lithium Iron Phosphate) cathode battery technology, announces the opening of the first industrial facility dedicated to LFP battery cell production in Europe. ElevenEs, backed by EIT InnoEnerg is leading battery innovation in Europe with its new production site, located in Subotica, Serbia. The manufacturing facility will specialise in producing high-quality LFP prismatic cells for use.

Can Serbia become the energy power of the world?

Serbia has a chance to become the energy power of the world in a few years. If we were to form an entire production chain in Serbia, it would certainly open up space for numerous investments in our country. The economic and market potential of this type of business model and supply chain in Serbia is enormous.
