

GETON CONTAINERS

# **Single-phase mobile energy storage container for data centers**

## Overview

---

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

What is a data center cooling and energy storage system?

In this study, a system for data center cooling and energy storage is proposed. The system combines the liquid cooling technology with the Carnot battery energy storage technology. The liquid cooling module with the multi-mode condenser can utilize the natural cold source.

Can data center cooling and energy storage meet current electricity pricing policies?

Continuous power and cooling requirements of data center make it difficult for conventional energy management systems to meet the current electricity pricing policies. In this study, a system for data center cooling and energy storage is proposed. The system combines the liquid cooling technology with the Carnot battery energy storage technology.

How a data center can benefit from energy storage?

Feasibility of the system is analyzed in three cities. Energy storage module can offset cooling module expenses. Electricity price has the most significant impact on net present value. To ensure the stable operation of electronic equipment, the data center needs uninterrupted power supply and cooling.

## Single-phase mobile energy storage container for data centers

### [BESS 500kwh 1MWh Container Battery Energy Storage System](#)

BESS 500kwh 1MWh Container Battery Energy Storage System Complete BESS Solar Power Plant drawing It features a three-level battery management system that ensures robust ...
