

Slovenia solar tiles

Overview

How much money does Slovenia need to build a solar project?

The researchers noted the importance of realistic construction methods, including factors such as anchors, adhesives, membrane welding, and ballast use. Slovenia has set aside €16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage.

When will solar subsidy applications open in Slovenia?

Applications for the subsidy will open Mar. 18, 2025. Slovenia's solar market slowed in 2024, but the residential segment maintained the largest share as it adjusted to the phase-out of net metering and a new electricity tariff system.

Did two Slovenian companies misrepresent a solar project to get EU funds?

The European Public Prosecutor's Office (EPPO) is investigating a €340,000 (\$349,350) fraudulent scheme allegedly involving two Slovenian companies accused of misrepresenting a solar project to obtain EU funds.
