

# **Solar Energy Storage Project**

## Overview

---

Where is a 100MW solar system being built?

The project in Turna, Xinjiang, China. Image: Lan Shengwen, a reporter from Gaochang District Media Center. A 100MW thermal solar and molten salt energy storage system in Xinjiang, China, is set to be completed and grid-connected by the end of the year, part of a project which has also deployed conventional solar PV.

What is Stafford Hill Solar & Storage Project?

Stafford Hill Solar + Storage Project Operational for 10 years, Green Mountain Power's Stafford Hill Solar + Storage Project combines solar power with battery storage to create a resilient and reliable power system for the community.

When will a 100MW solar & molten salt energy storage system be completed?

A 100MW thermal solar and molten salt energy storage system in Xinjiang, China, is set to be completed and grid-connected by the end of 2024.

What is energy storage technology?

Energy storage technology allows for a flexible grid with enhanced reliability and power quality. Due to the rising demand for energy storage, propelled further by the need for renewable energy supply at peak times, energy storage facilities and producers have grown tremendously in recent years.

## Solar Energy Storage Project
