Solar air conditioning in Bergen Norway

Overview

Where is the best place to install solar panels in Bergen?

The highest peak in the area is Mount Floyen (429 m). Areas to the south of Bergen, such as Rong, which have more open terrain and less hills would be most suited for large-scale solar PV. Additionally, areas along the coast with good access to sunlight could also be suitable for solar PV installations.

Where is solar energy produced in Norway?

Located in the Northern Temperate Zone, Bergen, Vestland, Norway exhibits a unique seasonal variation in solar energy production. During the summer season, each kilowatt of installed solar capacity can generate an average of 5.35 kilowatt-hours per day.

How many solar PV locations are there in Norway?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 58 locations across Norway. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations.
