

Solar container communication station box-type substation equipment

Overview

What is a container substation?

An intelligent solution for obtaining direct current quickly and economically is provided by container substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality.

Who makes the prefabricated box type substation?

The prefabricated box type substation (compact substation/package substation) is manufactured by Rockwill Electric in China. It meets IEC1330 standard and IP3X protection grade. The compact substation is adaptable to any harsh environments and being installed easily. We support customization for your special requirements. Contact us for your needs.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity. Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations.

Who makes package substation?

Contact us for your needs. The prefabricated box type substation (compact substation/package substation) is manufactured by Rockwill Electric in China. It meets IEC1330 standard and IP3X protection grade. The compact substation is adaptable to any harsh environments and being installed easily.
