

Solar energy storage income

Overview

Are solar energy and battery storage a good investment?

Solar energy and battery storage support employment in good quality and high productivity jobs, with an average GVA per job of £88,800 in 2024, over 40% larger than the UK average. Solar energy and battery storage contribute to economic activity across the UK while supporting the energy transition.

What is the market size of solar energy storage?

The market size for solar energy storage reached USD 46.7 billion in 2022 and is set to witness 15.6% CAGR from 2023 to 2032 due to the rising introduction of stringent regulations to promote environment sustainability. What is the value of the 2,501 to 5,000 kW solar energy storage industry?

.

How do solar energy and battery storage support economic activity?

Solar energy and battery storage support economic activity in several ways, as shown below. At the end of 2024 the UK had a total 20 GW of solar capacity and 7.5 GW of battery storage capacity. Over the period to 2035, activity across both technologies could expand significantly.

What is the demand for solar energy storage in 2022?

Demand for 2,501 to 5,000 kW capacity solar energy storage reached 18% of the market revenue share in 2022 owing to the rising favorable regulatory inclination for self-consumption. The solar energy storage market size surpassed USD 46.7 billion in 2022 and is poised to observe around 15.6% CAGR from 2023 to 2032.
