# **Solar module expansion project**

## Overview

---

How will Jupiter expand its manufacturing capacity?

It plans to expand its total manufacturing capacity to 5.6 GW of solar cells and 2.4 GW of solar modules. The present funding round and internal accruals will support its ongoing capital expenditure program. Jupiter is in the advanced stages of establishing an integrated solar cell and solar module manufacturing facilities in Bhubaneswar, Odisha.

Where is Jupiter launching a solar cell plant?

Jupiter is in the advanced stages of establishing an integrated solar cell and solar module manufacturing facilities in Bhubaneswar, Odisha. The facilities, which will have a cumulative production capacity of 4 GW and 2.8 GW, respectively, are expected to be commissioned in 2025.

Did Vikram Solar increase its PV module manufacturing capacity?

Vikram Solar said on Thursday that it had increased its solar photovoltaic (PV) module manufacturing capacity by 1 gigawatt (GW) at its Falta facility in West Bengal.

When will Amplus energy transition & Jupiter international start manufacturing solar cells?

In 2023, Amplus Energy Transition and Jupiter International announced a joint venture to set up a facility to manufacture up to 1.3 GW of solar cells and modules. The manufacturing facility was expected to be commissioned in 2025.

## Solar module expansion project
