Solar panel connection

Overview

How do I connect a solar panel to my solar panel?

1. Power adapter socket (optional)
2. WIND SENSOR
3. Channel setting slide switches (SW1)
4. Color-coded connector for connecting solar panel
5. Rechargeable battery compartment
6. RESET button
7. KEY button: for wind direction calibration
8. UV sensor socket (not available now)
- 1.

How do I install solar panel connectors in series?

To install solar panel connectors in series, start by laying out your panels in the order you want them connected. Next, connect the first panel's negative wire to the second panel's positive wire. Repeat this step until all panels are connected in a series.

How to connect solar panels in series?

When connecting solar panels in series, ensure that the maximum voltage output of all panels is within 30V-150V for the low-PV input port, and 80V-450V for the high-PV input port (you can choose either low-PV or high-PV if the maximum voltage output of all panels is between 80V and 150V).
