# Solar panels angle in Cordoba Argentina

## Overview

---

What angle should solar panels be tilted in Argentina?

Depending on where you are based in Argentina, the ideal angle to tilt your solar panels will vary by approx 26 degrees (between 46° from the horizontal plane facing North and 20° from the horizontal plane facing North). Argentina ranks 43rd in the world for cumulative solar PV capacity, with 1,071 total MW's of solar PV installed.

Where can I find solar PV potential in Argentina?

Explore the solar photovoltaic (PV) potential across 493 locations in Argentina, from Tartagal to Ushuaia. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations. If you have questions, feel free to contact us.

How many solar panels will Argentina install in 2024?

Argentina installed 307 MW of solar in 2024, bringing its total PV capacity to 1.67 GW by year-end, according to energy market operator Cammesa. Verano Energy, a renewables developer headquartered in Chile, has started building a 200 MW solar project in western Argentina. The installation is due for completion and connection before the end of 2025.

How much solar power does Argentina have?

Argentina ranks 43rd in the world for cumulative solar PV capacity, with 1,071 total MW's of solar PV installed. This means that 1.50% of Argentina's total energy as a country comes from solar PV (that's 35th in the world).
