

# **Solar panels for Vietnamese households**

## Overview

---

How many MW is rooftop solar power in Vietnam?

As of the end of 2024, rooftop solar power in Vietnam contributed over 9,500 MW to the total installed capacity of approximately 103,000 MW. This significant growth underscores the country's commitment to renewable energy. What government policies support rooftop solar power adoption in Vietnam?

.

How much solar power does Vietnam have?

Industry overview According to the International Renewable Energy Agency (IRENA), the installed solar power capacity, which is the maximum capacity that a solar system is designed to run at in Vietnam, accounts for more than a third of Vietnam's total renewable energy capacity at 18,854 GW in 2023.

Why are rooftop solar panels popular in Vietnam?

Vietnam's geographical diversity supports the widespread adoption of rooftop solar power systems. Solar panels can be installed efficiently across various terrains, including urban rooftops and coastal areas, making them a versatile renewable energy solution.

Is Vietnam a leader in solar energy?

Vietnam is rapidly emerging as a regional leader in solar energy in Vietnam, driven by abundant sunlight and strong government support. Over the past decade, the country has witnessed exponential growth in solar power capacity, transforming its energy landscape toward sustainability.
