

Solar panels in Belgian carports

Overview

What is a solar carport?

The solar carport combines a functional structure to protect your car with the production of green electricity. Equipped with solar panels on the roof, it transforms an exterior surface into a source of clean energy. Ideal for individuals and businesses alike, it's a durable, cost-effective and aesthetically pleasing solution.

What is a Belga solar carport?

The Belga Solar solar carport protects your vehicles from the elements while generating green electricity. Belgian manufacturer. Free quotation.

Can a solar carport increase parking capacity?

Greenbuddies Charging teams, in collaboration with installation systems manufacturer Adiwatt, recently completed a solar carport project in Belgium. The implementation involved the construction of 7 rows of carports with a total PV capacity of 1 MWp, with a unique design allowing dual vehicle parking under one canopy, increasing parking capacity.

Is a solar carport a good investment?

A solar carport is a smart investment that combines practicality with sustainability. By providing covered parking and generating renewable energy, it offers numerous benefits, from energy savings and environmental impact to increased property value.
