

Solar panels plus batteries for home use

Overview

Are solar panels paired with a home battery energy storage system?

By Sam Wigness | Dec 4, 2025 In the last year, nearly two-thirds of solar.com customers paired their solar panels with a home battery energy storage system (aka BESS). Why?

.

What is the best battery for a solar panel?

At 18 kWh, the SolaX Power T-BAT H battery offers the most capacity in a single module—one battery can store more than enough backup power for most homes. It's AC-coupling makes it compatible with retrofit installations, making it an excellent choice for those adding storage to an existing solar panel system. It has a solid 12-year warranty, too.

Should I add a home battery to my solar panel system?

Adding a home battery to your existing solar panel system in 2025 is a powerful way to enhance your energy independence, ensure backup power, and maximize the financial returns from your solar investment, especially in the face of evolving utility policies.

What type of battery does a solar system use?

When looking at residential and commercial energy systems, most solar installations utilize electrochemical storage batteries for backup power, with either lithium-ion or lead-acid chemistry. Similar to that used in electric vehicles and laptops, lithium-ion battery storage is the most common solar battery cell technology installed today.
