Southern Europe EK solar Energy Storage

Overview

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

How many energy storage installations are there in Europe?

The total number is slightly higher than the 2024 figures released a couple of months ago by the European Association for Storage of Energy (EASE), which, in partnership with the consultancy LCP Delta tallied 21.1GWh of installations last year in its ninth annual European Market Monitor on Energy Storage (EMMES) report.

Should the European Commission adopt an energy storage action plan?

The European Commission must adopt an Energy Storage Action Plan within a broader Flexibility Package, to harmonise markets, remove regulatory barriers, and ensure storage is integral to national energy strategies.

Why are European households turning to solar & battery storage systems?

Number of European households turned to solar PV and battery storage systems. This shift also aligned with efforts to lower carbon emissions. However, demand for residential solar and storage quickly outpaced supply, hampered by a widespread shortage of qualified
