

The proportion of solar energy storage in Ho Chi Minh City Vietnam

Overview

How much solar power does Ho Chi Minh city produce?

Seasonal solar PV output for Latitude: 10.8230989, Longitude: 106.6296638 (Ho Chi Minh City, Vietnam), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.58kWh/day in Summer.

How to optimize solar generation in Ho Chi Minh city?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Ho Chi Minh City, Vietnam as follows: In Summer, set the angle of your panels to 5° facing North. In Autumn, tilt panels to 16° facing South for maximum generation.

How much solar power does Vietnam have?

Industry overview According to the International Renewable Energy Agency (IRENA), the installed solar power capacity, which is the maximum capacity that a solar system is designed to run at in Vietnam, accounts for more than a third of Vietnam's total renewable energy capacity at 18,854 GW in 2023.

Why is solar power growing in Vietnam?

Solar power, in particular, has seen significant expansion due to the implementation of feed-in tariffs and the increasing adoption of rooftop solar systems. Wind energy also continues to grow, particularly in coastal regions, contributing to the diversification of Vietnam's energy mix and reducing reliance on traditional fossil fuels.
