The world's largest vanadium flow battery

Overview

What is the capacity of the world's largest vanadium flow battery?

It has a capacity of 175 MW/700 MWh. On December 5, 2024, Rongke Power (RKP) completed the installation of the world's largest vanadium flow battery . With a capacity of 175 MW and 700 MWh, this innovative energy storage system, located in Ushi, China, sets a new standard in long-duration energy storage solutions.

Is Rongke Power completing a 175mw/700mwh vanadium redox flow battery project?

Technology provider Rongke Power has completed a 175MW/700MWh vanadium redox flow battery project in China, the largest of its type in the world. The Dalian and Hong Kong-headquartered company announced the completion of the project on business networking site LinkedIn yesterday (6 December), providing a video of the finished project.

How much energy can a vanadium flow battery store?

A press release by the company states that the vanadium flow battery project has the ability to store and release 700MWh of energy. This system ensures extended energy storage capabilities for various applications. It is designed with scalability in mind, and is poised to support evolving energy demands with unmatched performance.

Why is Rongke Power a global leader in vanadium flow batteries?

With this achievement, Rongke Power reaffirms its position as a global leader in vanadium flow battery technology. The project also serves as a model for future installations worldwide, proving that vanadium flow batteries are a viable option for large-scale energy management. Follow us on social networks and don't miss any of our publications!
