

GETON CONTAINERS

# **Total investment of Tehran battery energy storage project**

## Overview

---

Will totalenergies develop battery-based energy storage?

By 2030, TotalEnergies aims to develop 5 to 7 GW of battery storage capacity, mainly in Europe and the United States. TotalEnergies is developing stationary electricity storage, notably through its subsidiaries Saft Groupe (Saft) and Kyon Energy. Why develop battery-based energy storage?

Why develop battery-based energy storage?

Which solar power plants have battery energy storage systems?

In the United States, our two solar power plants located in Houston, Texas, are equipped with battery energy storage systems: Danish Fields (150 MW / 225 MWh) and Myrtle (150 MW / 225 MWh). TotalEnergies develops battery-based energy storage solutions, which are essential complements to renewable energies, mainly in Europe and the United States.

How many MWh of battery storage capacity in France?

In France, we have 129 MWh of battery storage capacity. The battery farms are mainly installed at the Company's industrial sites: Dunkirk (61 MWh), Carling (25 MWh), and Grandpuits (43 MWh).

Who develops stationary energy storage?

TotalEnergies is developing stationary electricity storage, notably through its subsidiaries Saft Groupe (Saft) and Kyon Energy. Why develop battery-based energy storage?

Why develop battery-based energy storage?

The storage of electrical energy in batteries is an essential complement to renewable energies, which are intermittent by nature.
