

# **Turkmenistan solar panel aluminum frame size**

## Overview

---

Who makes a solar panel aluminum frame?

Wellste Aluminum has manufactured and supplied solar panel aluminum frame for over 20 years. 30 engineers, 10 years of aluminum industry working experience can offer you the best solution for your solar panel and solar system project.

What is solar panel aluminium extrusion?

Solar Panel Aluminium Extrusion refers to aluminum profiles made through advanced extrusion processes for solar applications. These profiles are used in solar panel frames, mounting system rails, clamps, hooks, and other structural components. They ensure stability, durability, and support for solar panels in various environments.

How long does a solar panel aluminum frame last?

Wellste solar panel aluminum frame is long-lasting, can be used for more than 30-50 years exposed outside. Wellste Aluminum has plenty of standard frame sectional size for solar panel aluminum frame, we have available mold which can save your cost and time, as like 25x25mm, 25x30mm, 30x35mm, 35x35mm, 35x40mm, 35x50mm and etc.

Why are aluminum panels used for solar panels?

Extruded aluminum profiles are usually used for solar panel frames and solar mounting system, because aluminum extrusions have high strength, light weight and strong corrosion resistance. The aluminum frame seals and secures the solar cell module between the glass cover and back plate, ensuring structural stability and extending battery lifespan.

## Turkmenistan solar panel aluminum frame size

---

### [Aluminum extrusion solar panel frame 6063-T5](#)

Solar panel frame is fixed aluminum alloy frame applied in PV field. Our solar panel aluminum frame usually made of 6063 aluminum alloy with anodized surface in order to ...
