

# **U S solar Energy Storage Project**

## Overview

---

What is the largest solar & storage facility in the US?

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California, includes 500 MW of solar and 500 MW of four-hour battery storage, all under a 15-year contract with Amazon.

What is the biggest solar-plus-storage project in the country?

"The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California, includes 500 MW of solar and 500 MW of four-hour battery storage, all under a 15-year contract with Amazon. When the full 2,000 MW Bellefield project is done, it will be the biggest solar-plus-storage installation in the country."

Will Bellefield be the largest solar-plus-storage facility in the United States?

Once completed, the 2,000 MW Bellefield project is expected to be the largest solar-plus-storage facility in the United States. "Completing the first 1,000 MW of Bellefield demonstrates how rapidly solar and storage can be deployed to meet the growing energy demand of data centers," said Andrés Gluski, AES President and Chief Executive Officer.

How many solar panels are there in California?

A new 875 MW solar project in California features nearly 2 million solar panels and offers more than 3 GWh of energy storage. From pv magazine USA Terra-Gen and Mortenson have announced the activation of the Edwards & Sanborn Solar + Energy Storage project, the largest solar-plus-storage project in the United States.
