

U S solar module exports

Overview

How many solar panels did the US import in 2024?

The United States imported approximately 14 billion U.S. dollars worth of solar PV modules between January and October 2024. Almost 40 percent of these solar panels imported into the U.S. during this period came from Vietnam.

How did US solar panel imports perform in the first three months?

Source: jgroup/iStock/Getty Images Plus via Getty Images. US solar panel imports remained robust in the first three months of 2024, coming in just short of the prior quarter's record 15 GW and notching a 13.8% gain from a year ago, according to the S&P Global Market Intelligence Global Trade Analytics Suite.

Which countries import the most photovoltaic modules?

Factories in four Southeast Asian countries — Vietnam, Thailand, Malaysia and Cambodia — accounted for 13 GW or 87.5% of the first quarter's total 14.8 GW of photovoltaic (PV) module imports.

What percentage of solar panels are imported from Vietnam?

Almost 40 percent of these solar panels imported into the U.S. during this period came from Vietnam. In 2012, the Obama administration implemented duties on solar equipment imported from China to counteract the competitive edge held by foreign companies.
