

Warsaw s new monocrystalline solar panel farm

Overview

Is RWE building a solar farm in Poland?

After commissioning the first solar farm from a construction pipeline of more than 100 MWac in June, RWE has now started the construction of another utility-scale solar project in Poland. Around 40,000 ground-mounted photovoltaic panels will be installed in the municipality of Deszczno (Lubuskie voivodeship) in Midwestern Poland.

Where is a solar farm located in Poland?

The first project has now been commissioned. The Bojanowo East ground-mounted photovoltaic farm with a capacity of 8.5 MWac is located in the Wielkopolskie region in central Poland, where RWE has installed more than 17800 solar modules that are able to supply green electricity to more than 4,300 Polish households annually.

How many solar panels will be installed in Poland?

Around 40,000 ground-mounted photovoltaic panels will be installed in the municipality of Deszczno (Lubuskie voivodeship) in Midwestern Poland. Borek solar project consists of three solar farms (10 MWac/10MWac/4MWac) with a total installed capacity of 24 MWac.

Will solar farms be able to supply green electricity to Polish households?

The solar farms will be able to supply green electricity to approximately 10,500 Polish households annually. Katja Wünschel, CEO RWE Renewables Europe & Australia: "Solar power plays an increasing key role in the Polish energy transition."
