

# **What is the transaction price of the Kite Energy Storage Cabinet**

## Overview

---

How much does a battery energy storage system cost?

In 2025, the typical cost of commercial lithium battery energy storage systems, including the battery, battery management system (BMS), inverter (PCS), and installation, ranges from \$280 to \$580 per kWh. Larger systems (100 kWh or more) can cost between \$180 to \$300 per kWh. How does battery chemistry affect the cost of energy storage systems?

.

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

Which battery chemistry plays a crucial role in cost?

Battery chemistry plays a crucial role in cost. Lithium Iron Phosphate (LFP) batteries are generally more cost-effective and safer compared to Nickel Manganese Cobalt (NMC) batteries. LFP batteries are favored in commercial applications due to their lower cost and higher safety profile.
