# **Where are Palestine Communications 5G base stations deployed**

## Overview

---

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

Which countries have 5G in the Middle East?

After the UAE, the next four MEA countries to get 5G were all in the Middle East, with launches in Bahrain, Kuwait, and Qatar in July 2019, followed by Saudi Arabia in the fourth quarter of that year. Africa's first 5G network was launched by wholesale operator Liquid Telecom South Africa in March 2020, using its 3.5GHz spectrum holdings.

How many countries are served by 5G?

He has a particular interest in wireless broadband and was responsible for TeleGeography's 4G Research Service until it was integrated into GlobalComms. According to the latest data from our GlobalComms Database Service, as of March 2023, 18 countries in the Middle East and Africa region are served by commercial 5G services.

When did 5G start in the UAE?

The first full commercial 5G mobile service in the MEA region was introduced by Etisalat in the United Arab Emirates (UAE) in May 2019, followed closely by its domestic rival Du the following month. Etisalat switched on the region's first pre-commercial 5G networks in select Abu Dhabi and Dubai locations in January 2018.
