

# **Which is better solar panels or solar glass**

## Overview

---

### Which solar panels should I Choose?

Long-term value: Double glass (mono glass) panels balance cost, durability, and warranty—ideal for most UK properties. Maximum performance: Bifacial panels are the top choice if you want the highest possible output and your site is suitable for them. Not all solar panels are created equal.

### What are the different types of solar panels?

With numerous options available on the market, it can be challenging to determine the best choice between single glass, double glass (also known as mono glass), and bifacial solar panels. This guide breaks down the real differences, so you can make the best decision for your property and your budget in 2025.

### How do I choose the right solar panels for my home?

Choosing the right solar panels for your home in the UK is about more than just price—it's about performance, durability, and long-term value. With numerous options available on the market, it can be challenging to determine the best choice between single glass, double glass (also known as mono glass), and bifacial solar panels.

### Are all solar panels the same?

Not all solar panels are created equal. Cheaper quotes often use single glass panels, which may look appealing but could cost more in the long run due to reduced lifespan and performance. Always check the panel type, warranty, and expected output, not just the price.
