

# **Which is more environmentally friendly a 1MW solar container in Havana**

## Overview

---

What is the first solar photovoltaic park in Havana?

HAVANA TIMES – On February 21, 2025, the first solar photovoltaic park was inaugurated, with a capacity of 21.8 MW. The project, located in Cotorro—on the outskirts of Havana—is part of the island’s government’s bet on solar energy to address the country’s dire electricity situation.

What is a solar energy container?

Comprising solar panels, batteries, inverters, and monitoring systems, these containers offer a self-sustaining power solution. Solar Panels: The foundation of solar energy containers, these panels utilize photovoltaic cells to convert sunlight into electricity. Their size and number vary depending on energy requirements and sunlight availability.

How many solar parks will Cuba build by 2025?

The Cuban government’s plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which aims to build 92 parks, with the goal of adding more than 2,000 MW to the National Electro-Energy System.

What are the different types of solar energy containers?

Solar Panels: The foundation of solar energy containers, these panels utilize photovoltaic cells to convert sunlight into electricity. Their size and number vary depending on energy requirements and sunlight availability. Batteries: Equipped with deep-cycle batteries, these containers store excess electricity for use during periods of low sunlight.
