Wholesale pv breaker isolator in Singapore

Overview

How do I choose the best circuit breaker & isolator?

Choose the product that best suits your needs based on the features and specifications listed above. Weatherproof circuit breakers & isolators (IP66 certified) protect circuits from overload, short circuits & leakage. Suitable for solar systems, engineering projects & home decoration, ensuring safety & reliability. | .

What is an electrical isolation system?

They are designed to prevent the flow of electrical current to protect electrical equipment or personnel during maintenance or repairs. Isolators come in different types and configurations, including fused and non-fused options, to suit different electrical requirements and applications.

What is an isolation switch?

Isolator switch is used to ensure that an electrical circuit is completely de-energised for service or maintenance. Such switches are often found in electrical distribution , where equipment must have its source of driving power removed for adjustment or repair.
